

IMEX America 2026

Wi-Fi Changes

What's changing?

- ➔ IMEX and Mandalay Bay will provide the primary Wi-Fi service across the show floor
- ➔ Exhibitors should use the official IMEX Wi-Fi network rather than bringing their own wireless equipment.
- ➔ Personal routers, access points and hotspot devices **will not be permitted** on the show floor

What do I need to do?

- ➔ Connect your devices to the official exhibitor network:
Network: IMEXExhibitors
Password: Mandalay
- ➔ **Do not bring or install your own router, access point or hotspot device**
- ➔ Only order additional internet services if you have a specific business need

Why are we making this change?

- ➔ Better Wi-Fi performance across the show floor
- ➔ Reduced wireless interference
- ➔ Simpler support and troubleshooting
- ➔ A more consistent experience for exhibitors and attendees

How does this save me money?

- ➔ No need to rent, ship or configure your own Wi-Fi equipment
- ➔ No setup or support costs
- ➔ Less time spent dealing with connectivity issues
