PERSONALISED SESSIONS

AROMA- AURICULOTHERAPY

A powerful dose of physical and mental wellbeing.

Auriculotherapy is based on the concept that the ear is a microsystem of the entire body. Stimulating key points on the ear helps to rebalance the nervous system and release natural “feel-good” hormones. Yoko further boosts these benefits with aromatherapy, using medical-grade essential oils.

Choose from four specialised sessions. Each treatment is performed with ear seeds, with the option of Swarovski crystals.

Anxiety, Insomnia, Migraine

Feel stress, sleeplessness and headaches melt away. This treatment releases tension in the head, neck and shoulders to calm the mind, promote good sleep and ease migraines.
